

OLEC1 Access OLE Construction Sites: Half Day Sentinel Certification

OLEC1 Access OLE Construction Sites: Half Day Sentinel Certification

The OLEC1 Access OLE Construction Sites: Half Day Sentinel Certification is a half day course based in the classroom. The course aims to provide the learner with the knowledge required under OLEC 1 to access OLE construction sites safely and effectively, for those directly and indirectly involved with OLE construction activities. This course is ideal for individuals whose work involves accessing OLE construction sites. The candidate will be over the age of 16, and will be sponsored by a link-up approved railway company to be signed on to this course.

Course Content

The course offers a basic introduction to what an OLE construction site is, the technical terminology used when working on these sites, and the general safety requirements for accessing these sites. The types of documentation associated with OLE sites, including the recording and reporting procedures will also be covered. The individual will also understand the hazards, risks and the limits of their personal authority on these sites.

Sentinel Scheme

The Sentinel system is a scheme from Network Rail that ensures all individuals that work in the railway industry are competent in their job role, and are medically fit to do so. Only approved training providers can deliver this training, with learners being subject to specific criteria they need to fit before being eligible to take part. This will be provided when making a booking, and we will encourage you to thoroughly check the learner meets this criteria before proceeding with the booking.

Developing U

If you are interested in this course, please contact Developing U directly to discuss pricing and course arrangements, as this is offered as an on-demand service.
